

Consent For Laparoscopic Surgery

Owner _____ Patient _____

Canine Feline Other _____ Male Female Breed _____ Age _____

Surgical Procedure _____ Other procedures _____

Laparoscopic surgery is a minimally invasive way to perform various surgeries to reduce the pain and healing time of your pet. Though this is routinely unlikely, there may be times during a laparoscopic procedure that it is determined that the procedure requires to convert to a traditional surgical method for safety or efficiency and is in the best interest of your pet.

I have read and understand the above statements. _____ Initials

Please answer and initial the following questions and statements.

- Pre-anesthetic blood work is recommended for all pets prior to any procedure that uses a general anesthesia. This blood work will not prevent complications to anesthesia but may reduce the risk of complications by postponement or change of a procedure, operation, or anesthetic protocol.

All pets over the age of 2 will require age-appropriate bloodwork for procedures estimated longer than 15 minutes. Any pet with medical problems may be required to have appropriate bloodwork to determine if anesthesia is safe.

I have read and understand the above statements. _____ Initials
